THE SOCIETY FOR THE SCIENTIFIC STUDY OF SEXUALITY

The Society for the Scientific Study of Sexuality is an international organization dedicated to the advancement of knowledge about sexuality. The Society brings together an interdisciplinary group of professionals who believe in the importance of both the production of quality research and the clinical, educational, and social applications of research related to all aspects of sexuality.

In 1957, The Society was founded to encourage rigorous systematic investigation of sexuality. The early 20th century had produced phenomenal growth in scientific understanding; however, similar gains were not being made in understanding sexuality, with knowledge often mixed with misunderstanding and confusion. Through interdisciplinary cooperation, The Society continued to support the study of sexuality as a valid area of research by the scientific community.

One of The Society’s strengths is the range of disciplines represented by its members, conference participants, and journal authors. A broad interdisciplinary perspective is insured by dialogue and research contributions from biologists, physicians, nurses, therapists, psychologists, sociologists, anthropologists, historians, educators, and theologians, etc.

Become a Society Member: Join one of the oldest global organizations of professionals interested in the study of sexuality. Keep up-to-date with the latest findings from diverse areas of research. Establish a continuing dialogue with colleagues in the sexual sciences who are working in a broad range of disciplines. Share your research, teachings, or clinical experiences with a group of professionals interested in knowing your work. Become part of a close-knit community of researchers.

SSSS Membership Benefits: In addition to participation in and reduced conference fees at the Annual Meeting, members receive: The Annual Review of Sex Research, The Journal of Sex Research, Sexual Science newsletter, a newsletter with information about The Society and related activities of interest; and The Membership Directory, a yearly directory of the membership. There are members-only and a student-members only listserv. Discounts are available for annual and affiliates’ meetings. Your membership in SSSS actively supports The Society's work in advancing knowledge about sexuality, rewarding research excellence, and promoting freedom of inquiry for researchers.

Eligibility for Membership: Membership is limited to applicants who have demonstrated an active professional commitment to the advancement of knowledge about sexuality. Applications are reviewed by the Membership Committee to determine eligibility; additional information may be requested.

If an applicant is accepted, membership becomes effective with payment of dues. Membership is paid on a calendar year basis only. After October 1, all membership dues paid will be applied to the next calendar year.

| North Mountain | Professional Networking Session: What is Sex Science? At last year’s annual meeting in Albuquerque, members of the Professional Networking Committee and several SSSS members worked with a professional videographer to create an educational video that explains the work we do. This video was guided by three questions: What is sex science? Why do we do sexuality research? And what is the Society for the Scientific Study of Sexuality?
| | Join members of the Professional Networking Committee as well as some of the participants from the project to discuss the topics and issues raised by the video. In addition to a screening of the video, the session is an opportunity for SSSS members to consider the work they do, imagine interdisciplinary opportunities, and even network to make those opportunities a reality. See you there!
